SUMMARY

Backend developer with 7+ years of experience, 4 years in TypeScript/Node.js services on AWS. Specialized in serverless microservices, third-party integrations, and production reliability.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript ES6+, PHP, Python, SQL

Tools: Node.js, NestJS, Express.js, Laravel, REST APIs, GraphQL, AWS Lambda, S3, RDS, DynamoDB, SQS, MySQL, PostgreSQL, Docker, Jest, GitHub Actions

EXPERIENCE

Tarmac.IO

March 2022 – August 2025

Software Engineer / Independent contractor

Montevideo, Uruguay

- Reduced time to detect external-service outages from hours to minutes by building Lambda/SQS health checks for provider-feed and API failures.
- Built authentication and classroom rostering for a K-12 platform serving 2,000+ students and 150+ teachers across 3 districts (NestJS, React, SSO).
- Built a brewery product-feed integration for a product-locator API, adding retry/backoff to handle unreliable third-party providers (Node.js, AWS Lambda, GraphQL).
- Improved reporting dashboard accuracy by tracing and unifying brittle cross-service product matching (Python, Pandas).

CodigoDelSur

September 2021 – April 2022

Software Developer

Montevideo, Uruguay

- Debugged policy status logic defects across Lambda microservices for a coastal flood and home insurance platform (Node.js, TypeScript, AWS Lambda).
- Wrote a Lambda debugging runbook adopted by the team for incident triage.

DESIGN-IT GmbH

November 2019 – September 2021

Software Analyst

Montevideo, Uruguay

- Cut booking wizard load times by 50% through performance profiling and targeted MySQL indexing.
- Contributed Laravel and Vue.js/Quasar features to a multilingual COVID-19 tracking platform that reached 22,327 users in five weeks and 11,829 clinical-research participants.
- Migrated legacy jQuery/PHTML modules to Vue.js for a trip booking platform used by Deutsche Bahn group travelers.

TiendaMIA

March 2018 – July 2019

Technical Support Assistant

Montevideo, Uruguay

- Automated URSEC/VUCE compliance workflows with PHP Magento extensions, cutting manual logistics reviews by 70%.
- Resolved bugs in coupons, cart, and order flows causing revenue loss and UX regressions (PHP, Magento, jQuery).

EDUCATION

Universidad de la República (Udelar) – Technologist Degree in Computer Science

2018

University of Cambridge – Cambridge English: B2 First (FCE)

2014
