SUMMARY

Software engineer with 7+ years delivering backend systems and APIs in Node.js, TypeScript, and AWS. Integration-heavy work spanning microservice reliability, third-party integrations, and observability, improving clarity and speed when diagnosing production issues. Backend-oriented delivery with cross-stack contributions as needed, including React features and UI flow debugging.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript ES6+, PHP, Python, SQL

Tools: Node.js, NestJS, Express, Laravel, REST, GraphQL, React, Vue, AWS Lambda, S3, RDS, DynamoDB, SQS, MySQL, PostgreSQL, Docker, GitHub Actions, Cursor, Copilot

EXPERIENCE

Tarmac.IO

March 2022 – August 2025

Software Engineer / Independent contractor

Montevideo, Uruguay (Remote)

- Built authentication and rostering with React and NestJS for a learning platform serving 2,000+ students and 150+ teachers across 3 districts, enabling roster-driven access to classroom tools.
- Built Lambda/SQS health checks to surface third-party outages earlier, shortening detection time when external APIs and supplier feeds fail.
- Built third-party brewery API feed integration into Node.js AWS Lambdas powering a storefront GraphQL product locator across microservices.
- Raised reporting dashboard accuracy by unifying brittle cross-service product matching in Python/Pandas after tracing mismatches across microservices.

CodigoDelSur

September 2021 – April 2022

Software Developer

Montevideo, Uruguay (Remote)

- Shipped serverless coastal flood/home insurance policy status flows in Node.js and TypeScript on AWS Lambda through two-week Scrum cadences with CI/CD-gated releases.
- Produced internal Lambda debugging notes used in incident triage; isolated and patched defects across AWS-hosted microservices.

DESIGN-IT GmbH

November 2019 – September 2021

Software Analyst

Montevideo, Uruguay (Remote)

- Profiled a multi-step Laravel booking wizard and drove MySQL indexing changes that cut load times by 50%.
- Built full-stack Laravel, Vue.js, and Quasar components for a multilingual COVID-19 tracking platform, supporting mobile releases that reached 22,327 users in five weeks and 11,829 active clinical-research participants.

TiendaMIA

March 2018 – July 2019

Technical Support Assistant

Montevideo, Uruguay

- Automated URSEC / VUCE compliance workflows using Magento extensions in PHP with weekly logistics alert keyword rules, reducing manual checks by 70% and improving flagging of regulated imports.
- Restored checkout correctness and downstream order data integrity by repairing revenue-facing coupon, cart, and order pipelines in Magento and aligning jQuery-augmented front ends with backend state.

EDUCATION

Universidad de la República (Udelar) – Technologist Degree in Computer Science

2018

University of Cambridge – Cambridge English: B2 First (FCE)

2014
